

CHECKLIST FOR MULTICAMERA STREAMING

CAMERAS

- Multi-camera setup (check that all cameras are functional).
- You can also add virtual cameras.
- Tripods or mounts for stable positioning.
- Spare batteries or power sources.

LIGHTING

- Soft lighting for each camera angle for clear visuals.
- Backup lights in case of failure.

AUDIO EQUIPMENT

- Microphones for each source (wireless mics if necessary).
- Audio mixer for balancing multiple audio sources.
- Cables (XLR, 3.5mm) for audio connectivity.
- Headphones for monitoring audio output.

INTERNET ACCESS

- Good internet connection (wired connection preferred).
- Backup internet connection (e.g., mobile hotspot) if possible.
- Min upload speed 305 Mbps.

CAPTURE DEVICES

- Capture cards compatible with your cameras and streaming software.
- Cables (HDMI, SDI, USB) of suitable length for each camera.

SWITCHER

- Hardware switcher or software like OneStream Live for switching between cameras.

LAPTOP OR COMPUTER

- Powerful enough to handle multi-camera processing.
- At least 8GB RAM.
- Solid State Hard Drive (SSD).
- At least 4 USB ports.

STREAMING SOFTWARE

- Configure each camera as a source in your app.
- Install and Open OneStream Live.
- Label each source clearly for easy switching.
- Sync audio to avoid latency with video.
